

DataBinding Sample

The table below is populated from sample data in a CSV file.

- First, an OBJECT tag is used to create a Data Source Object (DSO) and load the dataset from a CSV file.
- Next, the TABLE element is bound to the data by specifying the DSO ID in a DATASRC attribute.
- Finally, content in the cells is bound to fields in the dataset with DATAFLD attributes. Rows inside the TBODY element are repeated for each record in the dataset.

To view the source, right-click anywhere and select "View Source" from the shortcut menu.

A	B	C
12-Jul	45	897.75
13-Jul	35	698.25
14-Jul	56	1117.20
15-Jul	87	1735.65
16-Jul	66	1316.70
17-Jul	72	1436.40
18-Jul	49	977.55
19-Jul	65	1296.75
20-Jul	40	798.00
21-Jul	20	399.00
