

Time for a break. This lab should be fun.

STEP 1: Color Correct

Open the lab images in Photoshop. Color correct and sharpen each image.

STEP 2: Size Images

Using Image Size, size the images so that the long side of the photo is 200 pixels.
(2 images will be 200 pixels wide and 1 image will be 200 pixels high)

STEP 3: Give Images a Border

Using Canvas Size give each image a black border of 5 pixels on each side.

STEP 4: Give Images a Copyright

Copyright your images. Use any technique you like.

STEP 5: Put Images onto a Layout Page

Create your own page layout using these three images in Photoshop.

STEP 6: Post your Layout to Forums

When the layout is completed, reduce the layout page to 500 pixels wide.
Save the layout as a jpg image (use a quality of 6), this will flatten it.
Post it to Forums > Academic Forums in the provided place.
